## Early Years Special Education

**Services are aimed at families with children from birth until the end of the second year of kindergarten with developmental problems and / or in difficult domestic circumstances.**

**As a parent you are worried about your child's development, because you are noticing that your child**

- as a baby, cries a lot and is difficult to calm down
- shows little interest in people and/or objects
- rarely plays alone
- is restless and rarely concentrates on anything for a prolonged period
- is very reserved, anxious or does not recognise danger
- requires a lot of time to learn new things
- rarely imitates actions, sounds or words
- doesn't speak or only speaks very little

**As a parent you are uncertain with respect to child-rearing, because you are experiencing that your child**

- is very or not at all shy with strangers
- often quarrels with other children
- does not accept "no" or appears not to listen
- often breaks things
- has very violent tantrums

**What do we want to achieve?**

- to strengthen parents' trust in their child's abilities
- to help parents to better understand their child's behaviour and recognise his/her developmental needs
- to strengthen the parenting skills of parents
- to familiarise parents with play facilities matched to their child's development
- increase their child's self-efficacy and independence
- to strengthen relationships inside and outside the family
- to facilitate the integration of their child into the social environment

**Our services**

We inform, advise and support children and their parents and are a point of contact for any queries with respect to the development, upbringing and education of your child.

**Evaluation**

We evaluate your child's level of development playfully and with special consideration of his/her life situation, strengths and development potential.

**Consultation and support**

We support children in their special developmental progress in cooperation with the parents and with targeted play matched to the child's level of development and everyday activities.

**Brief consultation**

We are happy to offer advice by phone or arrange an appointment with you.

**Cooperation**

In consultation with parents, we work together with other specialists.

**Prevention**

The sooner a child is registered, the more effectively can their development opportunities be recognised. We support parents in creating living conditions that promote development.

**Our methods**

We work with your child at home or in the premises of stiftungNETZ. Appointments are scheduled according to an agreed frequency.
